Introduction to Ed Green Electric, Inc.

Ed Green Electric, Inc. was founded in 1975 and incorporated in 1989 by Ed Green to provide quality affordable electrical services to the Hocking Valley. Ed, though retired, is still a major influence in the business today with the High Voltage Maintenance and safety portions of our business.

Matt Green, Ed's son, took over the reigns in 2007 and has introduced new areas of work and expertise to the company. Ed Green Electric is well known for its diverse electrical background ranging from residential to heavy industrial, petrochemical, even traffic signalization, generator installation and service, and high-voltage work.

With Matt being a licensed professional engineer and EGEL being a certified engineering company in Ohio, we also now offer complete engineering services for your project from Design-Build and Turnkey projects to complete power studies for your commercial and industrial facilities.

EGEL is an Ohio EDGE certified business through the HUBZone and DBE programs and can offer our full spectrum of services under an EDGE contract.

Through our dedication to quality, work ethic, customer service, and safety we have provided our customers with a premiere end product independent of project size or application.

We would like to Thank You in advance for your interest in our company and the services that we may provide for you.

CONTRACTOR QUALIFICATIONS

Corporate Pledge

Ed Green Electric, Inc. was founded on the principals of providing affordable electrical solutions in a first class manner no matter of project size or application. We continually strive to be the best possible choice for your project. We will use the latest advances in technology, our vast experience base, and work with you and your suggestions to provide the very best possible solutions. Our customer based approach will ensure that the solution is successfully implemented by EGEI and you the customer and you are fully vested in the end product. This co-operative approach will allow us to succeed as market leaders and set the standard for others to strive for.

EGEI will stand behind any work we perform as if it were for our own benefit and will support you as a client to that end. We will ensure that all project work is completed in a safe professional workman like manner and that all work is completed to the customers strictest guidelines.

Our goal is to be “ The Company for ALL your electrical needs”.

Key Service Areas

New Installations:

EGEI has been successful at many levels of new construction from new custom homes and tenant build-outs to multi-level office complexes. We have experience with a variety of projects ranging from low voltage (Tele-Date, Audio/Video, and Smart-Homes) to full electrical distribution for petroleum pipeline transfer stations.

Service:

EGEI is a full service electrical contractor providing the most comprehensive service team around. We have 24 hour response and technicians that have a vast experience base. We employ the latest technology to aid in our addressing your system issues and to ensure a rapid yet safe solution. Our service team also has the capability to perform most minor service calls on the spot without a return aiding in customer up-time.

Maintenance:

EGEI can work with you to develop a customized maintenance plan for your equipment or facility and implement it with minimal disruption to our customer.

Generators:

EGEI is a leader in generator installation and service, we are an authorized dealer and service provider for BOTH Generac and Kohler and are associated as service providers with most major generator brands. We have an in-house staff trained and certified to provide these services and can provide turnkey projects providing not only electrical, but also mechanical and structural services.

Some of our clients included Seneca Steel Erectors, CH2M Hill Companies, Keynes Bros. Flour Mill, Gabriel Logan, Dollar General, Wal-Mart, Cummings-Ryder Environmental, LeanTrak Engineering, Perfection Mechanical, Ohio Department of Natural Resources, Ohio Industrial Commission, The Ohio State University, Daimler Construction, and Nauman Outdoor Advertising.

CONTRACTOR QUALIFICATIONS

Other Service Areas

Fire Alarm & Low Voltage:

EGEI has licensed fire alarm technicians on staff and can provide services from testing to installation for a variety of Fire Alarm systems. We can provide all aspects of low voltage from tele-date to audio/video systems for your home, office, or entire facility. We have staff with over 50 years of combined alarm and custom low voltage applications.

Engineering Services:

EGEI is an authorized engineering provider in Ohio and has engineers licensed in Ohio, we can provide complete facility electrical design, power studies, or simple wiring diagrams for your project. We utilize AutoCAD, Microstation, Microsoft Visio, ETAP Electrical Analysis Software, and many other software based engineering packages to ensure your project looks as good on paper as it does in your mind.

Equipment:

EGEI has a fleet of equipment from personnel lifts and trenching equipment to bucket trucks and digger derricks to facilitate all of our electrical installations and ensure safe and proper materials and equipment handling.

CONTRACTOR QUALIFICATIONS

Equipment

EGEI has multiple pieces of equipment to ensure we complete the project safely and using proper installation techniques.

Our equipment includes:

Service Vehicles: Cargo Vans and Pick-Up Trucks

Bucket Trucks: 45' 4x4 Single Man and 60' Two Man

Line Truck: Altec 40' 3 Stage Digger Derrick with up to 36" Auger

Project Trailers, Cargo Trailers, Flat Bed Trailers

New Holland Skid Steer

Vermeer Trencher/Backhoe—Digging Depth 6' 8" Wide

25' Electric Man Lift

Electric Conduit Benders, Pipe Threading Equipment, Cable Pulling Equipment

Temporary Power Stands from 575 Volts through 120 Volts

High Voltage Termination and Splicing Tools

Tele/Data Testing, Locating, and Termination equipment

Due to our on-going working relationships with both major clients and other contractors we can rent/lease or subcontract most any equipment needed to provide the best possible installation or service you require.
